

Central Park Dentistry

★ Readers' Choice: Dentist

We would like to thank our patients for voting for Central Park Dentistry as 2018 Reader's Choice Dentist. Our whole team is humbled by your loyalty, and excited to be honored with this award now for several years in a row! We see this award as validation of our outstanding customer service, solid community involvement, and excellent patient care.

At Central Park Dentistry, the positive energy is palpable as soon as you walk in the door. Our team is eager to assist you with your needs! We are always welcoming new patients, young and old. Our loyal patients will tell you that all of our doctors and staff develop connected relationships with each patient. Our patients also enjoy the fun-filled atmosphere in our office.

The customer service at Central Park Dentistry is second to none! We realize dental care can be stressful for many reasons. Our clinical team and doctors work to get to know you, your dental history and how we can improve your health and experience. For many patients, it can be using proven techniques to reduce anxiety. For others, they desire to be more

educated in their personal care and choices. Our front office team is trained to help you understand your insurance benefits and how you can utilize them. Everyone at Central Park Dentistry strives to be an educator and advocate for patients to understand the benefits of great oral health!

Central Park Dentistry strives to be a partner in our community. This year alone, we educated over 750 local school children in Mason City, Rockwell and Sheffield. All the children had a fun presentation and received a bag of personal hygiene items. We participate actively in local causes by attending, donating, and volunteering. Our doctors have been active in the North Iowa Free Dental Clinic.

We provide a great mix of modern technology and treatment, along with time-proven techniques. In office, we now have the ability to make 3D xrays of the teeth and jaw, when needed, for a more exact diagnosis. Dr. Lala can use this to remove impacted wisdom teeth with precision. We all use 3D technology to aid treatment especially root canal therapy. We use an ITERO digital scanner for the doctors to create 3D models of the patient's teeth and

bite. Digital scanning eliminates impressions, making the treatment easier, faster and more accurate. Dr. Hansen can use the ITERO to educate patients on their personal bite issues and the outcome of future Invisalign treatment in a matter of minutes. Drs. Lala and Hansen use these technologies to provide dental implants to patients who need missing teeth replaced.

Dr. Jennifer Thackery joined us 3 years ago and has been a "perfect fit". Dr. Thackery is skilled in utilizing technology and creating comprehensive treatment plans. Most importantly, she's able to communicate treatment options in a way people trust.

We had exciting new changes at Central Park Dentistry this year! We opened an office in Sheffield, a solid community that we are thrilled to become a part of. All our doctors see patients here too, for your convenience.

We had two home grown doctors join our team this year. We are proud to have Dr. Patrick Kolker of Clear Lake and Dr. Brianna Brayton of Meservey. Both have trained at the University of Iowa and come highly recommended by University Faculty. We know you will enjoy getting to know them both!

We look forward to creating the best dental experience for your entire family. Again, thank you for this honor and your trust. Remember, You will leave with a Smile!

*We are humbled by our patient's generosity!
Thank You North Iowa For Voting Us Readers' Choice Dentist.*
